

IN OUR SCHOLARS' WORDS

"The program was life changing. The eye-opening experiences, the incredible exposure, and the inspirational speakers. . . It has truly impassioned me to become a doctor."

"Possibly the greatest summer program I have ever been in. I will never forget this."

"FACES touched my heart more than any other program I have been in. Impacted is not the word; it's more like inspired or changed."

LOGISTICS

Tuition: \$2,100

Dates: July 15 - 26, 2019

Time: Mon-Fri, 9:00 am - 4:00 pm

Location: Samuel Merritt University

SUMMER MEDICAL ACADEMY 2019

We are seeking highly motivated high school students who are interested in a career in medicine.

Come have fun with us!

FACES WANTS YOU TO BE YOUR BEST!

FACES for the Future started in 2000 at Children's Hospital, Oakland. Since that time, we've created new programs in Albuquerque, Denver, San Diego, Hayward, Oakland, South Alameda County, Sacramento and San Francisco.

Our FACES Summer Medical Academy has been offered since 2005.

FACES Scholars engage in clinical skills practice.

CLINICAL SKILLS TRAINING

FACES wants students to get hands-on learning so we offer workshops in clinical skills including taking vital signs, suturing and gross anatomy.

We work with professionals from:

Emergency Department	Orthopedics
Global Health	Public Health
Nursing	Physical Therapy
Occupational Therapy	Simulation Technology
Family & Community Med	Nurse Anesthetists
Physician Assistant	Pharmacy
Mental Health	Biomedical Research
Palliative Care	Health Education

KNOWING THE LANDSCAPE

FACES works to help students understand healthcare in a modern age. What is telemedicine? What is the importance of public health, culturally relevant care, the social determinants of health and the role of interdisciplinary teams in delivery.

PROBLEM BASED LEARNING

After the ACA, now more than ever, students need to learn how to work together to deliver care to diverse patient populations. We stress interpersonal communication, learning to ask the right questions, solutions driven training and working with case scenarios to enhance understanding.

PATIENT CENTERED CARE

The FSMA trains youth in the importance of patient centered care delivery models that respond to issues in medical ethics, cultural competency, and end-of-life care. We strive to help students understand the human aspects of health.

MENTORSHIP & PROFESSIONAL NETWORK

FSMA students are mentored by undergraduate students pursuing careers in health and taught by health professionals. By participating in the FSMA, students build their future professional network.
